While doing the assessment work on the first northwest extension of the Flores, W. B. Campbell encountered a six foot ledge of high grade gold ore that will mill away up. On the hanging wall is a two foot streak that will average away up in the thousands per ton. The property is owned by W. N. Gourlay, of Philadelphia, who is also largely interested in the Flores Gold and Silver Mining Company. It is likely that as soon as Mr. Gourlay is cognizant of the strike a large force of men will be put on to develop the property. It is among the possibilities also that the Flores mill will start up on this ore, as there is enough in sight now to keep the mill pounding away for months.

Your reporter, while looking over the mining field of Cerbat and vicinity went up where Mr. Campbell was at work and it is a veritable bonanza.

Judge W. G. Blakely was the only successful Good Templar in the recent election, and his accession to the office of District Attorney of this county was duly celebrated Thursday night by the members of the order by a grand banquet at the residence of Mr. and Mrs. R. Everyone present enjoyed the repast, and with anecdote and reminiscence the evening was most enjoyably passed. Judge Blakely is a past Chief Templar of the order and is everywhere held in the highest esteem.

W. A. Neal and James Barrett were up from the Big Sandy the early part of this week. Mr. Neal reports the mines of Burro Creek looking exceptionally well and thinks that the coming winter will produce a wonderful change in the camp. A mill for the working of free gold ores will be put in and many mines now idle will be worked. Burro creek will furnish unlimited horse power for milling purposes.

Mr. Baker, president of the Cedar Valley Mining Company, is still at Cedar. He is much pleased with the results obtained so far from trial runs made on ores from different mines owned by the company. It is probable that the company will put in large reduction works in the near future.

Thomas Stevens has discovered a wonderful ledge on Burro Creek upon which he has been at work for some weeks. The ore will run 10,000\$ per ton, and samples from the find are practically laced together with wires of gold. From an ounce of pulp Mr. Stevens obtained three dollars.

For the past six months the newspapers published in the mining districts have been devoting less and less attention to mining as the election approached. In the meantime there has been a greater increase in the interest of the people in that industry than ever before. This has been going on, too, in spite of the fact that in all other industries capital has been "waiting until the election is over."

The wife of Mr. Leonard Wells, of East Brimfield, Mass., had been suffering from neuralgia for two days, not being able to sleep or hardly keep still, when Mr. Hoiden, the merchant there, sent her a bottle of Chamberlain's Pain Balm, and asked that she give it a thorough trial. On meeting Mr. Wells the next day he was told that she was all right, the pain had left her within two hours, and that the bottle of Pain Balm was worth 5\$ if it could not be had for less.
